STATE AND LOCAL ENVIRONMENTAL LIBRARIES

Introduction

This directory of State and Local Environmental Libraries was compiled by the staffs of the Library Systems Branch, EPA Headquarters, and the EPA libraries around the nation. It is an attempt to gather the names and addresses of the many libraries now involved in the collection and dissemination of environmental literature. It should prove a guide for liaison and cooperation among all the libraries with a common interest, and make the body of environmental information accessible to as many interested persons as possible.

It is readily acknowledged that this is not a comprehensive directory and additional entries will always be welcomed. General university libraries have not been included, nor have document divisions of these and public libraries, since the primary portions of such collections are not presumed to be environmentally oriented. Specialized departmental libraries of both university and public libraries have been included where they specifically relate to environmental activities.

Telephone numbers and names of librarians have been provided when available, but no claim is made to the currentness of these two items.
